# LEADER OF THE PROGRAMME

**Irina A. Yankina**, Doctor of Economic Sciences,  
Head of Academic Research Laboratory for Banking  
Technologies

**Google Scholar:** [scholar.google.ru/citations](https://scholar.google.ru/citations)

"Being a challenging and dynamic sector, the financial services industry requires graduates who can manage across an array of main bank operations, as well as understand global finance, risk management and ethical decision making – issues which are essential to modern financial companies.

Broaden and enhance your knowledge, comprehension and skills in the area of domestic and international banking and risk management by learning from our diverse teaching team. They have first-hand experience, academic and industry expertise in both public and private sectors"

## WHAT OUR STUDENTS THINK ABOUT THE PROGRAMME

**Frederick Anning** from Ghana is planning to continue his education and get a PhD degree: "I got a bachelor's degree in my homeland. Banks and finance are my major. In the future I'm planning to develop in this direction. I had no difficulties, I passed an online interview, all lessons were in English, but if there were any difficulties teachers were always ready to help".

"I learned about the program from the Internet, by that time I had finished studying in Rome and was going to continue my education, but in a different area and place. I also studied several languages at once – one of them was Russian which I chose because it doesn't resemble any European language, while in Europe the knowledge of Russian is highly appreciated. I'm planning to return to Italy soon and find a good job, – said the graduate of the program **Anna-Lisa Cancelli**. "I don't regret coming here. It was tough sometimes as I didn't study banking before, especially not in a language different from my mother tongue. However, it was much more difficult for me to get used to frosts".

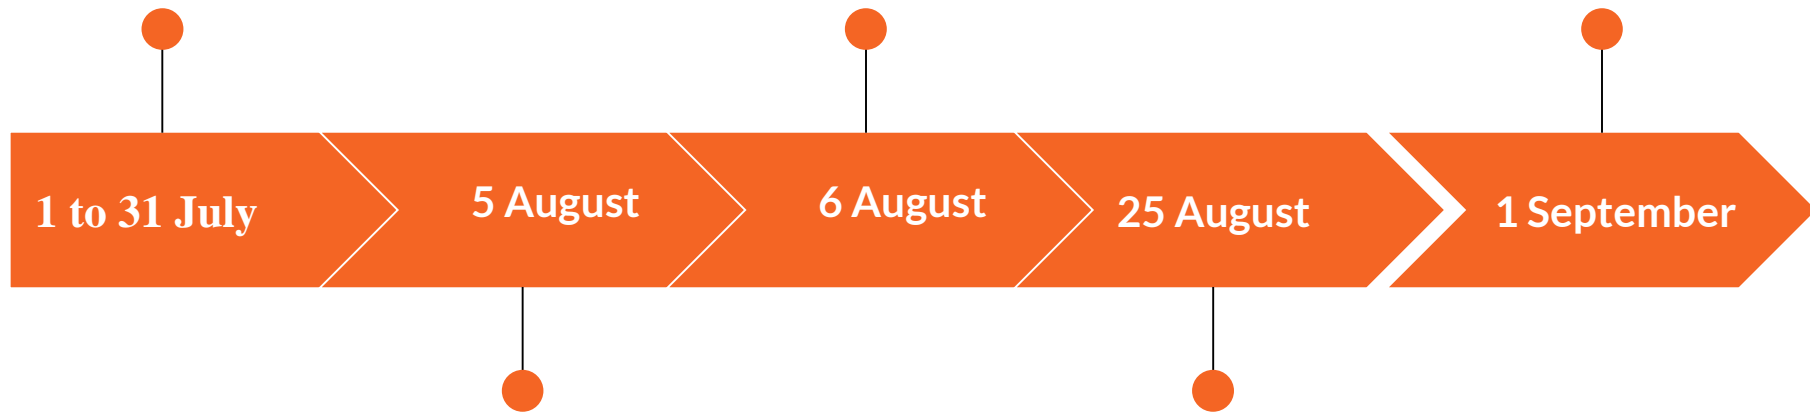

# Admission and Application 2021

**Submission dates**

**Entrance tests**

**Start Date**

**Consultation**

**Enrollment for the program**

**Foreign applicants are able to have an online entrance testing in the form of an interview right after the submission dates** (after 1st July, when the SibFU International Students Recruitment Office receives your email application), on a suitable and arranged day and time, before the official entrance testing which is intended mostly for local candidates.

Entrance tests are conducted orally, in the form of interview in accordance with the program of entrance examinations
