The program is aimed at training social scientists with fundamental theoretical knowledge and modern methods of sociological research. Fundamental theoretical training opens up opportunities for graduates to perform analytical work in the administrative divisions of government and business structures. Possession of the technologies of applied sociological research allows working as researchers of modern society, including independently organizing research enterprises.

The modules of the program cover all the main spheres of modern society, which contributes to the formation of students’ comprehensive knowledge about modern society, its components and processes.

**Prerequisites:**
- A certificate of complete secondary education or a state diploma of secondary vocational education

**Qualification:** Bachelor's Degree in Sociology

**Skills/ objectives:**
- the ability to sociological analysis and scientific explanation of social phenomena and processes based on scientific theories, concepts, and approaches,
- the ability to identify socially significant problems and determine ways to solve them based on theoretical knowledge and the results of sociological research,
- the ability to organize and conduct sociological research to study the requirements of the labor market and students for the quality of vocational training,
- the ability to process and analyze sociological data to prepare analytical decisions, expert opinions and recommendations.
