Bachelor's Degree Program

APPLIED PSYCHOLOGY IN EDUCATION

The purpose of the educational program:
training of a teacher-psychologist who meets the requirements of the time for the implementation of activities for the successful socialization of the younger generations, ready to solve various psychological problems of the development and maturation of a child. Not only traditional forms of organizing the educational process (lectures, seminars) are used, but modern active forms of education: business games, trainings, social design. Many training sessions are conducted directly in the workplace.

Curriculum is built on a modular basis; each module combines several subjects that allow our students to study comprehensively the subject of professional activity and form the necessary professional skills; based on the results of studying the module, students develop and implement a real project based on practice. Accounting for the achievements of students in the module is based on the presentation of the educational project.
A distinctive feature of the educational process is a large number of practices in schools, kindergartens, institutions of additional education, social institutions, which begin from the first days of study at the university.

Prerequisites:
- Entrance examinations in disciplines: Biology
- Russian language
- Social Studies
- Additional points are taken into account (certificate with honors, all-Russian, regional and regional Olympiads, victories in educational and sports activities). The department organizes olympiads for schoolchildren, giving additional points for admission.

Qualification: Bachelor's Degree

Skills/ objectives:
- Graduates of the program can work in the fields of education, social sphere and youth policy, in correctional and educational institutions.
- Professional activities of the graduate: psychological and pedagogical counseling and support; education, development, prevention, correction, rehabilitation.
