Master's Degree Program

PERSONAL DEVELOPMENT

The goal (mission) of the magistracy in the direction 44.04.02.01 "Personal development" - the formation of general cultural and professional competencies in students, necessary for solving professional problems in the field of psychological and pedagogical activity.

One of the main conditions for studying in a master's program is the involvement of students and teachers in fundamental research.

Another condition for organizing training for a master's program is compliance with the needs of the modern labor market, focus on practice-oriented training, and close communication with employers.

The content of the training of masters involves the development of competencies in the areas of research, methodological and project activities, as well as activities in psychological and pedagogical support and counseling of the individual. The preparation of a master's degree in pedagogy and psychology of personality development should ensure the development of professional and personal competence, a willingness to carry out research and design conditions conducive to personality development, and provide various types of support, counseling and support for a person in crisis life circumstances.

The content of master's training in accordance with this idea ensures the inclusion of students in scientific research and practice-transforming activities, involving high-level practitioners in the preparation.

The development of personal competencies of undergraduates is ensured by conducting various personal trainings, supervisory support during the practice and implementation of the professional activities of the master.
